LeetCode

Experience

Aptean

September 2024 - Present

Associate Software Developer

Coimbatore, India

- Engineered and maintained scalable **Full Stack** applications using **React**, **Node.js**, **Spring Boot**, and **microservices** architecture, drawing on **2+ years** of full stack development experience across academic and production environments; designed and owned a carrier API orchestration service serving **50K+ daily requests** across **15+ carriers** with defined integration contracts and data flows.
- Built and deployed **RESTful backend services** and **serverless integrations** on **AWS Lambda** with auto-scaling across regions; instrumented end-to-end request tracing via **CloudWatch** and **ELK**, and optimized **React** frontend (code-splitting, memoization, lazy loading) improving Time-to-Interactive by **40%** with **responsive, accessible UI** components.
- Led the design and rollout of a **metadata-driven carrier mapping system**, eliminating ~40 hrs/month of manual configuration and enabling non-engineers to onboard new carriers without code changes.
- Debugged and resolved 20+ production issues** across distributed **.NET Core**, **Node.js**, and **React** services; followed **SDLC** best practices including unit testing, staged deployments, and post-release monitoring to maintain system reliability.
- Delivered internal tooling powered by **Azure OpenAI** (RAG system, Multi-Agent workflows) that reduced engineer lookup time by ~**60%** and cut carrier integration effort by ~**70%** per onboarding.
- Actively participated in **code reviews**, technical design discussions, and **cross-team collaboration** to deliver production-ready features; authored design docs, mentored new engineers, and established reusable patterns across a **10+ engineer** team.

Projects

JobNest – Microservices Job Portal · React, Spring Boot, MongoDB, Redux, JWT, GraphQL

- Engineered a scalable job portal with **Spring Boot microservices** (auth, jobs, applications) in Java and React + Redux; secured with **JWT authentication** and **role-based access control (RBAC)**.
- Exposed a **GraphQL API** layer for flexible job search queries, reducing over-fetching and enabling precise filtering by title, location, and experience; optimized **MongoDB** schema with compound indexes, reducing average search latency by ~35%.
- Built a fully **responsive** UI with mobile-first layouts and **accessible** form controls (ARIA labels, keyboard navigation) to ensure cross-device usability.

LinkedIn Content Agent · Node.js, Gemini API, LinkedIn API, Multi-Agent AI, React

- Developed a **full-stack AI content automation platform** that transforms a single topic prompt into a publish-ready LinkedIn post using a **3-agent pipeline** (Planner → Writer → Reviewer) orchestrated with **Gemini API**.
- Integrated **LinkedIn OAuth 2.0** and direct publishing via the **LinkedIn official API**, eliminating manual copy-paste and maintaining posting consistency.
- Crafted a **React** frontend showing live agent-reasoning traces and post-quality scores, with approval gates before publishing — giving the user full control over AI output.

DocReady – Document Analysis & Migration Readiness Tool · React, Node.js, Spring Boot, Gemini AI, REST API

- Built a **full-stack document analysis tool** that parses **.docx** and **.pdf** files, extracts structural metrics, and evaluates readability using **Google Gemini AI** to determine migration readiness for knowledge-base platforms.
- Designed a **structured verdict engine** producing actionable outputs (**READY** / **READY_WITH_MINOR_CHANGES** / **NEEDS_RESTRUCTURING** / **NOT_READY**) with categorized strengths, issues, and suggestions per document.
- Delivered a clean **React** frontend with file upload, real-time analysis progress, and a structured results dashboard — answering “*Is this document ready for migration? If not, what needs fixing?*”

Education

Sri Krishna College of Engineering and Technology

December 2021 – May 2025

Bachelor of Technology in Information Technology · **CGPA: 7.75/10.00** · **Coursework:** DSA, OS, DBMS, OOP, Cloud

Coimbatore, TN

Technical Skills

Languages & Frontend: Java, Python, JavaScript, SQL, C#, Solidity, React.js, Redux, HTML5, CSS3, Responsive Design, Accessibility (ARIA)

Backend: .NET Core, ASP.NET Core, Node.js, Express.js, Spring Boot, REST APIs, GraphQL, Microservices, API Development, WebSocket

AI / LLM: Azure OpenAI, RAG, Multi-Agent AI, pgvector, Embeddings, Prompt Engineering

Cloud & DB: AWS (Lambda, S3, API Gateway, CloudWatch, ALB, RDS), Azure OpenAI, Docker, Git; MongoDB, Elasticsearch / ELK (NoSQL), pgvector, SQL Server, MySQL

Concepts: System Design, Distributed Systems, Object-Oriented Design, Multithreading & Concurrency, Data Structures & Algorithms, Design Patterns, SDLC, Agile, Automated Testing, Production Support, JWT & OAuth

Achievements and Certifications

- LeetCode:** Solved **400+ problems** focused on data structures, algorithms, and system design patterns.
- Smart India Hackathon 2023** — Qualified internal college round, outperforming 150+ teams with a system design solution.
- Certifications:** AWS Academy Cloud Foundations · Red Hat OpenShift Applications · Oracle Java SE 8 · Coursera Python · Udemy React & Redux.
